GROWTH CAMPAIGNS & CASE STUDIES

One Reel, Thirteen Members: Yodha Gym | **Paid Campaign + Self-Directed Growth Plan** Aug 2026

Paid reel (INR 500 fee) for a ~100-member gym, plus a self-directed 90-day growth plan | 18-page case study

- Hired by the gym owner to produce its promotional reel: 20,000+ organic views at zero ad spend, converting to 20 enquiries and 13 paid memberships, a 13% increase in the member base from one piece of content.
- Argued retention over acquisition and built a 3-engine plan (discovery, trust, retention) on a 90-day roadmap costing under INR 1,000 in Phase 1.
- Designed retention around people rather than tooling: a peer mentor programme pairing experienced members with new joiners, scoped in writing to cover injury liability and the limits of unqualified coaching.
- Benchmarked 5 competitors across 8 dimensions, found an uncontested local-SEO gap, and flagged Google's incentivised-review policy as a compliance risk that would have voided the plan.

The Best Room in Town: Marketing Plan for Cafe Chawk | **Independent Case Study** Aug 2026

Positioning, discovery, content and retention plan for an independent Tier-3 cafe | 17-page report

- Diagnosed a business with the best room in its town and no way to be found: no Google listing, no reviews, no social presence, in a market where every local food decision starts on Google Maps.
- Built the positioning around the one asset a competitor cannot copy quickly, the room itself, and ranked every other asset by time-to-copy.
- Designed the discovery plan: a complete Google Business Profile, a review system built around Google's incentivised-review and review-gating rules, and an Instagram plan to make the room worth photographing.
- Built a six-month occasion calendar and a retention system (QR to spreadsheet, four-visit card, birthday messaging), replacing discounts with value-in-kind rewards.
